Eliminate the need for overhead ventilation. That's what our founder Lou Jenn did in 1965 when he defied convention and physics itself to create JennAir's signature downdraft ventilation technology. The downdraft vent effortlessly integrates with any customized cooktop.

With hundreds of possible configurations available, you can create the bespoke custom cooktop that suits your needs, and more importantly, your desires.

## V E N T I L A T I O N

Let your kitchen breathe. Four distinct ventilation types from the originators of downdraft technology.

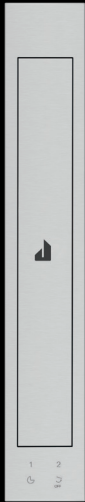

V E N T I L A T I O N

For full ventilation offering including hood liners, see page 139.

DOWNDRAFT

The innovation that started it all. Our downdraft ventilation system uses proximity ventilation to capture smoke, steam and odors at the cooking surface, whisking them down and out of the kitchen before they can escape.

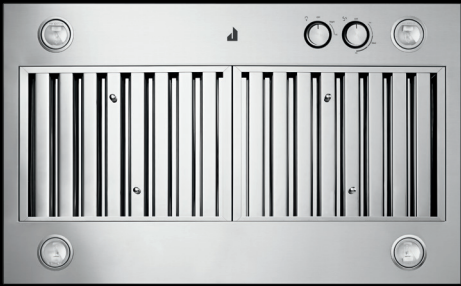

PROFESSIONAL-STYLE

These luxury hoods are designed to work with high-heat, commercial-style cooking appliances. Powerfully clearing the air of smoke, steam and cooking odors.

WALL MOUNT & ISLAND MOUNT

Wall installation allows the hood to seamlessly blend in with kitchens that follow a more traditional layout. Island-mount hoods expand installation options to kitchen islands and peninsulas. If exterior ducting is not possible or is undesirable, the JennAir® wall-mount recirculating-only hood is available and doesn't require a separate recirculating kit.

LINER

Custom hood liners are hidden ventilation systems mounted to the inside of a custom vent cover (which can be made of metal, wood, plaster or tile), offering a uniquely streamlined look. They also offer you a choice of motors for different levels of ventilation power. Motor options sold separately.

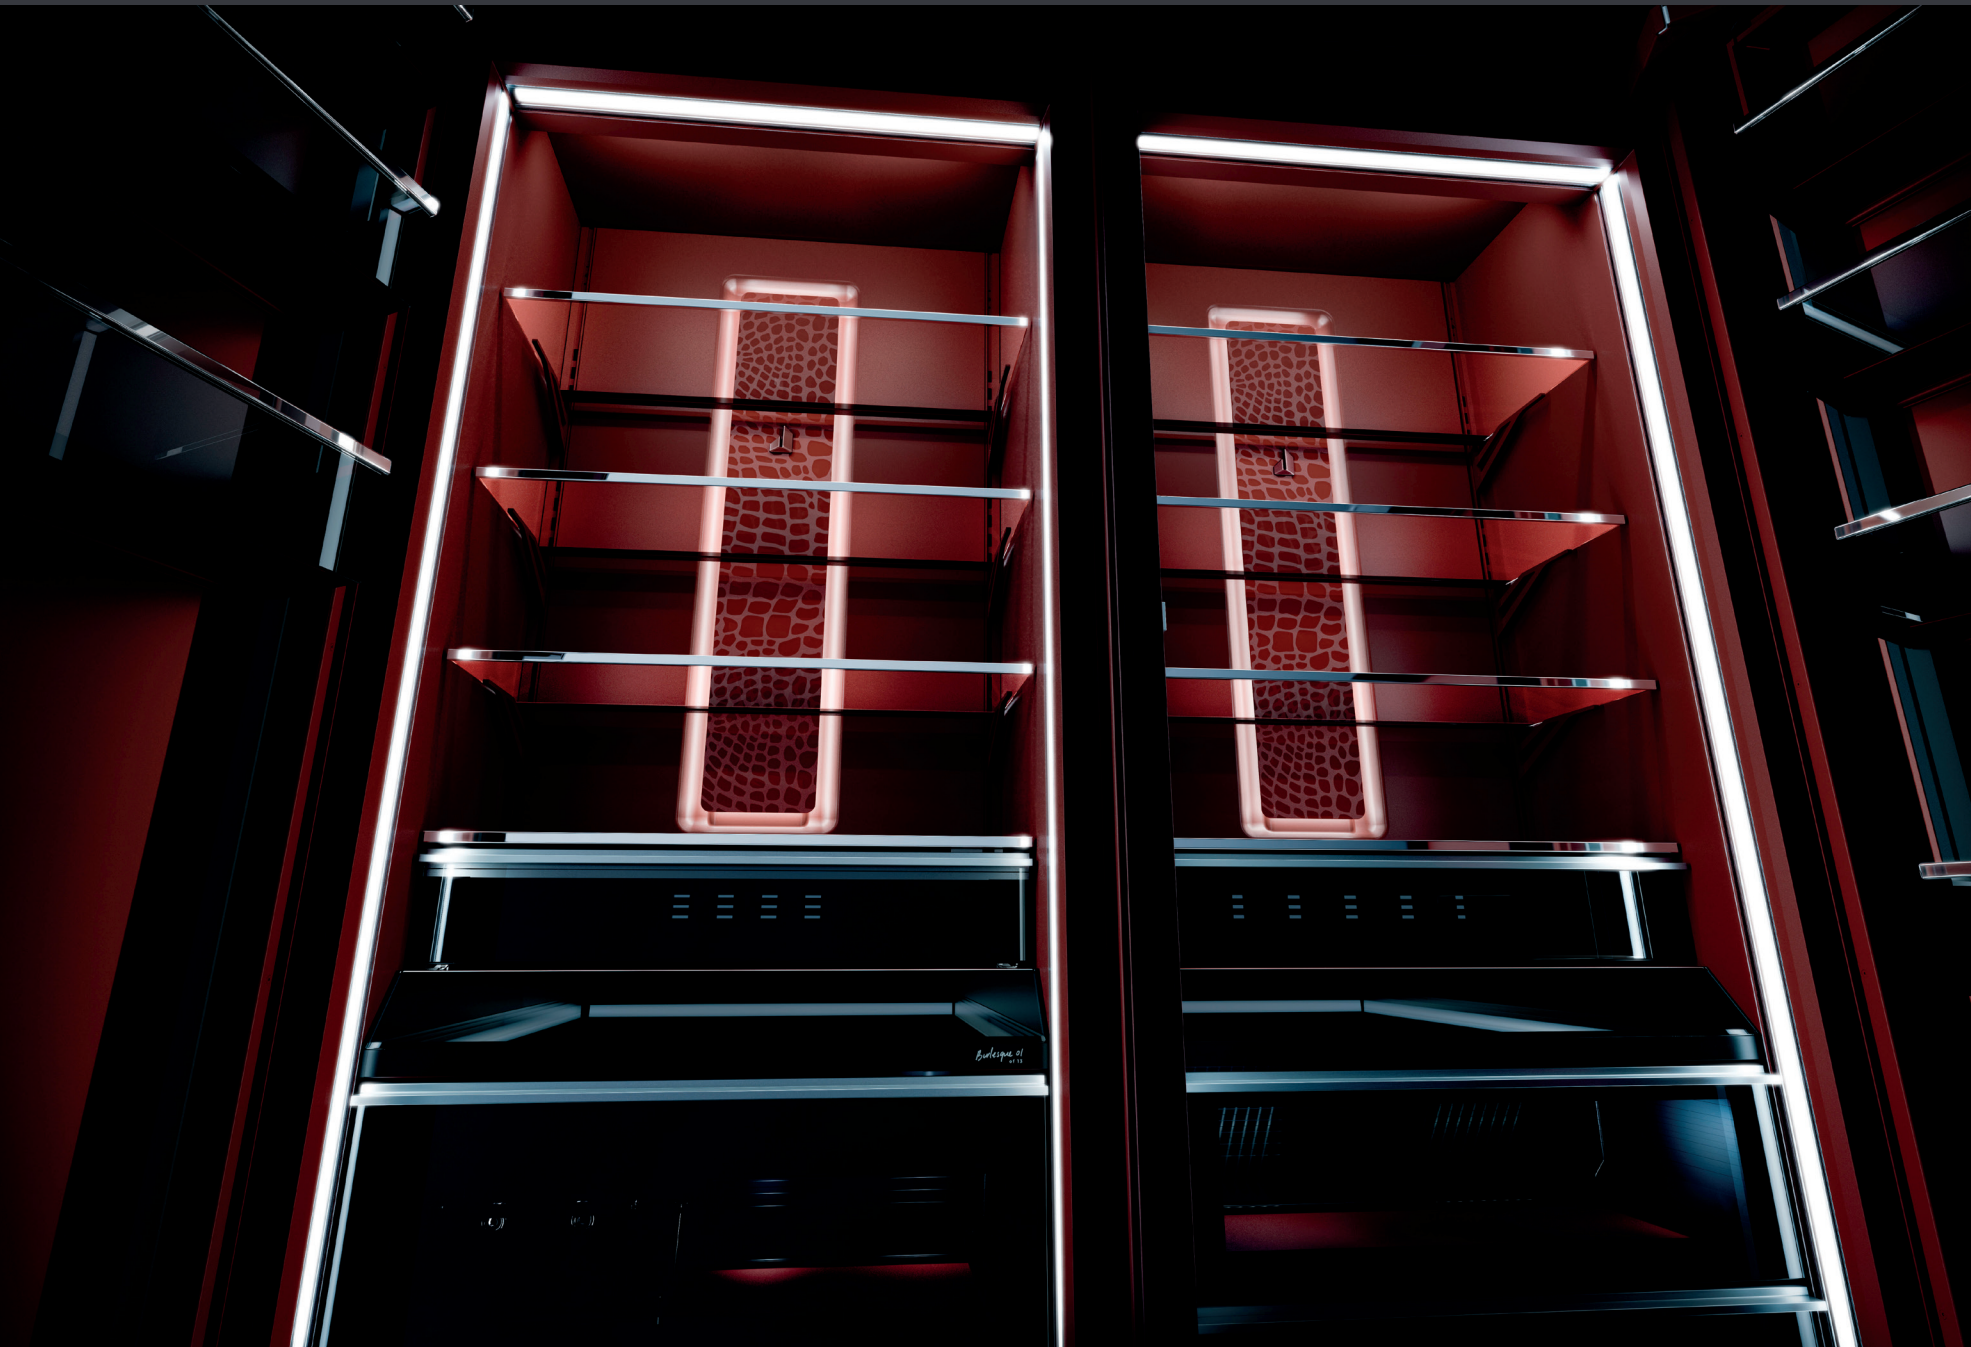

Warming lamps, inspired by  
restaurant kitchens, keep food  
warm until ready to serve.
