LOCATION REQUIREMENTS

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

A 115 V, 60 Hz, AC only, 15 A or 20 A fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

⚠ WARNING

Explosion Hazard

Keep flammable materials and vapors, such as gasoline, away from refrigerator.

Failure to do so can result in death, explosion, or fire.

For the refrigerator to be flush with the front of the base cabinets, remove any baseboards or moldings from the rear of the opening.

Flooring under product must be at the same level as the room. If the floor of the opening is not level with the kitchen floor, shim the opening to make it level with the kitchen floor.

WOOD PANEL GUIDE

⚠ CAUTION

Pinch Hazard

Installation of door panels with less than a ³/₈" (0.95 cm) gap between the door panel and the adjacent cabinet increases the risk of potential pinching.

IMPORTANT:

- The graphics in following sections show a custom panel for a door with the hinges installed on the right-hand side. If your refrigerator has the hinges installed on the left-hand side, rotate the custom frame 180° so the hinge markings will be on the left.
- Panel dimensions shown are the minimum size to cover the appliance door. Panels can be made taller/wider to match surrounding cabinetry.
- The recommended thickness of the overlay panel is 3/4" (19 mm).
- Custom solid door overlay panel must not weigh more than 20 lbs (9.07 kg).
- Custom glass door overlay panel must not weigh more than 10 lbs (4.54 kg).
- Overlay panels weighing more than recommended may cause damage to your appliance.
