

## JUIFX15HX

### PANEL-READY 15" UNDERCOUNTER ICE MACHINE WITH ARTICULATING HINGE AND DRAIN PUMP

Sip away. A supply of pure, crystalline ice melts slowly for undiluted joy. With the unbroken silhouette of stealth flush design and a system that skims minerals away, you're free to focus on entertaining.

## FEATURES

### STEALTH FLUSH DESIGN

Create an unbroken silhouette. Discreet ⅛" reveals envelop every side, without exposed hinges or trim pieces.

### CRYSTALLINE ICE

Slow melt, reduced fizz. Adorn your next cocktail with glittering, clear ice.

### DRAIN PUMP

A system that drains excess water over a greater distance or an incline without the need to monitor or empty water manually.

### 25 LB. CAPACITY

Pour another. Indulge long into the night with clear ice always on hand.

### SMOOTH CLOSE DOOR

Quiet, soft, secure. An articulating hinge discreetly ushers the door open and gently pulls it closed.

\*Install <sup>3</sup>/<sub>4</sub>" (1.9 cm) front hinge-side spacer flush with face of adjacent cabinet and <sup>3</sup>/<sub>4</sub>" (1.9 cm) back hinge-side spacer 6" (15.2 cm) from back wall.

### ELECTRICAL REQUIREMENTS

115 volt, 60 Hz, AC only, 15- or 20-amp fused, grounded circuit is required. A dedicated circuit is recommended. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

### WATER PRESSURE REQUIREMENTS

A cold water supply with water pressure between 30 and 120 psi (207 and 827 kPa) is required to operate the ice maker. Call a licensed, qualified plumber with any questions about the water pressure.

### Reverse Osmosis Water Supply

**IMPORTANT:** The use of a reverse osmosis system with this product is not recommended. However if you do use reverse osmosis, follow these instructions.

**IMPORTANT:** The pressure of the water coming out of a reverse osmosis system going to the water inlet valve of the ice machine needs to be between 30 and 120 psi (207 and 827 kPa).

If a reverse osmosis water filtration system is connected to the cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

**IMPORTANT:** Dimensional specifications are provided for planning purposes only.

**Do not make any cutouts based on this information.** Refer to the Installation Guide *before* selecting cabinetry, verifying electrical/gas connections, making cutouts or beginning installation.

All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.
