MODEL #		JID4436ES	
		in	cm
A	Width of combustible area above cooking surface (min.)	36	91.4
B	Width from cooktop to fixed wall or other combustible material (min.)	2 ¹ / ₂	6.4
C	Width to outer edge of outlet from centerline of cabinet (max.)	24	61.0
D	Height to top edge of outlet (min.)	12	30.5
E*	Height to bottom of uncovered wood or metal cabinet above cooking surface (min.)	30	76.3
F	Height to bottom of uncovered wood or metal cabinet (min.)	18	45.7
G	Depth of upper cabinet (recommended)	13	33.0
H	Depth from cutout to wall (min.)	1 ¹ / ₂	3.8
I	Width of cutout (recommended)	35 ⁷ / ₁₆	90.0
J	Depth of cutout (recommended)	20 ⁷ / ₈	53.0
K	Depth from cutout to front of countertop	2 ¹¹ / ₁₆	6.8
e	Recommended electrical access location		

*Dimension can be reduced by 6" (15.2 cm) when bottom of wood or metal cabinet is covered by not less than 1/4" (0.6 cm) flame retardant millboard covered with not less than No. 28 MSG sheet metal, 0.015" (0.4 mm) stainless steel, 0.024" (0.6 mm) aluminum or 0.020" (0.5 mm) copper.

ELECTRICAL REQUIREMENTS

120/240 volt, 60 Hz, AC only, 40-amp fused, electrical circuit is required. A dedicated circuit is required.

VENTING REQUIREMENTS

See pages 3-8 for ducting information. This cooktop must be exhausted outdoors unless using the duct-free filter kit (W10807915). Refer to kit instructions for further information.

LOCATION REQUIREMENTS

- To ensure cooktop base clearance, cabinet side walls need to be wider than the cutout.
- A minimum clearance of 6" (15.2 cm) is recommended between the side of the cooktop and side wall for maximum ventilation performance.
- A minimum clearance of 2" (5.1 cm) is recommended between the blower motor and cabinet for proper cooling. A 6" (15.2 cm) clearance is recommended for servicing access.
- An under counter built-in oven cannot be installed under this cooktop.

IMPORTANT: Dimensional specifications are provided for planning purposes only.

Do not make any cutouts based on this information. Refer to the Installation or Use & Care Guide before selecting cabinetry, verifying electrical/gas connections, making cutouts or beginning installation.

All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.

DUCT-FREE KIT

W10807915 – 18³/₈" x 8³/₄" x 4"

DUCT-FREE VENTILATION

The duct-free filter kit (W10807915) is approved for use with induction downdraft cooktop model JID4436ES. The kit filters the air from the downdraft system and ventilates the conditioned air into the room through the toe kick or pedestal of the base cabinet. Do not ventilate the air from the downdraft system into the base cabinet, base cabinet pedestal, crawl space, wall or attic.

OPENING/CLEARANCE DIMENSIONS

DOWNDRAFT COOKTOP DUCTING ARRANGEMENTS

The diagrams below show typical duct arrangements for downdraft cooktops. The JID4436ES induction downdraft cooktop also offers a duct-free installation option. For more details, refer to pages 3-5.

OPENING/CLEARANCE DIMENSIONS

3/4 TOP VIEW – REAR DUCTING

		in	cm
A	Width of rear cabinet cutout (max.)	17	43.2
B	Height of rear cabinet cutout (min.)	4	10.2
C	Height from cabinet floor to bottom of cabinet cutout (min.)	1	2.5

DUCTING REQUIREMENTS

COOKTOP	DUCT LENGTH	DUCT SIZE
Electric/ Induction	10' (3.0 m) or less*	5" (12.7 cm) diameter*
	Between 10' (3.0 m) and 60' (18.3 m)	6" (15.2 cm) diameter
		3 1/4" x 10" (8.3 cm x 25.4 cm)

*May be used to vent straight out the back of the cooktop and directly through the wall.

DUCTING CONFIGURATIONS

REAR DUCTING IN WALL TO ROOF

CALCULATING MAXIMUM DUCTING LENGTH

- Maximum ducting length is 60' (18.3 m).
- Each 90° elbow equals 5' (1.5 m) duct.
- Use no more than three 90° elbows.
- Flexible metal vent is not recommended.
- Do not install two elbows together.

NOTES:

- For ducting runs up to 30' (9.1 m), install cooktop as shipped.
- For altitudes above 4500' (1372 m), reduce recommended vent run by 20% for best performance.
- For round duct installations, use transition elbow between blower housing and ducting.

REAR DUCTING THROUGH WALL TO OUTSIDE

IMPORTANT: Dimensional specifications are provided for planning purposes only.

Do not make any cutouts based on this information. Refer to the Installation or Use & Care Guide before selecting cabinetry, verifying electrical/gas connections, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.

DOWNDRAFT COOKTOP DUCTING ARRANGEMENTS

The diagrams below show typical duct arrangements for downdraft cooktops. The JID4436ES induction downdraft cooktop also offers a duct-free installation option. For more details, refer to pages 3-5.

OPENING/CLEARANCE DIMENSIONS

3/4 TOP VIEW – DUCTING THROUGH CABINET FLOOR

		in	cm
A	Depth of cabinet bottom cutout (min.)	11	27.9
B	Width of cabinet bottom cutout (max.)	17	43.2

DUCTING REQUIREMENTS

COOKTOP	DUCT LENGTH	DUCT SIZE
Electric/ Induction	10' (3.0 m) or less*	5" (12.7 cm) diameter*
	Between 10' (3.0 m) and 60' (18.3 m)	6" (15.2 cm) diameter
		3¼" x 10" (8.3 cm x 25.4 cm)

*May be used to vent straight out the back of the cooktop and directly through the wall.

CALCULATING MAXIMUM DUCTING LENGTH

- Maximum ducting length is 60' (18.3 m).
- Each 90° elbow equals 5' (1.5 m) duct.
- Use no more than three 90° elbows.
